Experience

Addepar | Mountain View, CA | Sept 2016 - Present

Software Engineer (Javascript, Ember.js, Java)

Investment management cloud based technology company that offers an integrated financial software platform

- Led the development of a feature that enabled advisors and admins to dictate what resources they can see and manage. This feature was crucial in on-boarding some of Addepar's biggest clients, as it allowed smooth integration from their existing workflows.
- Designed and developed a compliance feature with Addepar's report editor that allowed our admins to set and remove certain parts of the report for all reports generated within the firm
- Helped implement and support audit trail using ElasticSearch / Kibana
- Worked closely with our design and product team across all facets of ideation and development
