## Experience

**Google** | Venice, CA | Jan 2019 - June 2021

Software Engineer (Dart, Angular, Java, Javascript)

Ads Planning

- Developed an app to help advertisers uncover trends, understand their audience, and build actionable marketing strategies
- Visualized data gathered from a variety of sources like Google Search, Youtube, Geo, and Display Network in ways that is easy to understand and navigate
- Championed for accessibility as an a11y lead, auditing new features and existing app to ensure that our product is accessible to everyone
- Refactored the code and documentation to replace any terminology that may be, directly or indirectly, hurtful or derogatory
- Maintained dashboards to help monitor user activity and allowlisted agencies

**Addepar** | Mountain View, CA | Sept 2016 - Nov 2018

Software Engineer (Javascript, Ember.js, Java)

Investment management cloud based technology company that offers an integrated financial software platform

- Led the development of a feature that enabled a smooth integration from the existing workflows, which was crucial in on-boarding some of Addepar's largest clients
- Developed a compliance feature with Addepar's report editor that allowed our admins to set and remove certain parts of the report for all reports generated within the firm
- Implemented and supported audit trail using Elasticsearch / Kibana
- Collaborated with our design and product team across all facets of ideation and development

## Skills

**Javascript, Java, Dart, jQuery, React, MySQL, HTML/CSS, Ember.js**
